

Shraddha Singh

Product Manager · Fintech · Insurtech · Enterprise SaaS

Bengaluru, India shraddhasingh8968@gmail.com +91-XXXXXXXXXX linkedin.com/in/shraddha-singh-9149a4172 shraddha2789.github.io

SUMMARY

Product Owner with 6+ years across fintech, insurtech, and enterprise SaaS. Experienced in roadmap planning, customer research, and working across engineering, design, and business teams to ship products that hold up under pressure. Looking to take on a broader PM role with direct ownership of a product area and its outcomes.

EXPERIENCE

Sapiens International — Senior Product Owner Oct 2024 – Present
CoreSuite Insurance Platform · Bengaluru, India

- Defined and maintained the product roadmap for an insurance platform serving 500K+ customers, managing prioritisation across 50+ items across 6 release cycles.
- Built a prioritisation method weighing client impact, technical risk, and revenue potential — reduced planning debate and gave engineering a clearer quarterly backlog.
- Coordinated delivery across engineering, QA, architecture, and client success; shipped with a 95% pre-production quality rate and zero P1 defects reaching clients.
- Identified UI friction causing transaction abandonment; worked with design and engineering on targeted fixes that reduced drop-off by 25% and improved platform adoption by 15%.

Signzy Technologies — Product Owner Jan 2024 – Sep 2024
Digital Onboarding Platform · Bengaluru, India

- Managed the product for a B2B banking onboarding platform used by Yes Bank and IndusInd Bank; cut customer onboarding time from 3 days to under 2 hours.
- Identified the actual failure point (document upload drop-offs, not processing speed) through 3 months of transaction log analysis — fixed it with a guided capture UI before any AI model changes.
- Launched RBI-compliant KYC workflows that improved verification accuracy by 35% while maintaining audit trail requirements.
- Built analytics dashboards tracking conversion funnels and KYC pass rates; findings informed 3 product direction changes and improved client satisfaction scores by 20%.

Deloitte Digital — Product Consultant Nov 2021 – Jan 2024
Enterprise Solutions & Digital Transformation · Bengaluru, India

- Led product delivery on a \$10M GenAI transformation for Health Care Service Corporation (HCSC) — mapped 180+ agent workflows and sequenced 10+ AI features by risk and business readiness.
- Prioritised smart email drafting before real-time agent assist; 78% AI draft acceptance rate in sprint 4 validated the sequencing and unlocked program expansion, delivered 20% ahead of schedule.
- Improved agent productivity by 60% through AI feature implementation on TrueServe, Deloitte's Salesforce-based contact centre platform.
- Defined product requirements for Fortune 500 clients including Apple Inc. and HCSC through stakeholder workshops and structured specification documents.

Iksula Services — Business Analyst / Product Jul 2019 – Oct 2021
E-commerce Platform · Mumbai, India

- Shipped 6 e-commerce products end-to-end for ITC, Eureka Forbes, and ELC Toys — from discovery and wireframes through go-to-market.
- Prioritised a personalisation engine over checkout optimisation after identifying that discovery, not checkout, was the real conversion bottleneck; drove a 16-point improvement in conversion rate.
- Ran A/B tests across 3 client accounts: personalised homepage (+8pp), mobile PDP restructure (+6pp), abandoned cart emails (22% recovery rate).
- Received Quarterly Excellence Award for demonstrating product ownership mindset in a BA role — first time the award was given on that basis.

EDUCATION

SKILLS

MBA
Jamnalal Bajaj Institute of Management
Studies (JBIMS)
2025

Bachelor of Engineering
[University Name]
[Year]

SIDE PROJECT

JobSignals — Hiring Signal Intelligence Platform [jobsignals-e9w5.onrender.com](#)

Built a data product that converts job posting data into structured hiring signals — skills demand, company hiring velocity, and salary bands — served via REST/GraphQL API. Wrote a full 17-section PRD covering personas, data governance, API consumer types, and phased release milestones.
